Full Stack Developer with formal training in Programming (UTN FRC), specializing in backend development with Java and Spring Boot, complemented by frontend development using Angular. Experience building end-to-end web applications, from REST APIs and business logic to modern user interfaces with reactive forms. Knowledge of microservices, Docker, and event-driven messaging (Kafka). Seeking my first professional IT opportunity by delivering efficient and scalable end-to-end solutions.

Technical Skills

Backend: Java, Spring Boot, APIs REST, JPA / Hibernate, SQL (PostgreSQL), Microservices Architecture, Kafka (event-driven).

Frontend: Angular (standalone components, signals, reactive forms), TypeScript, HTML, CSS, Bootstrap.

Architecture and Design: Clean Architecture (applied in projects), DTO Design, Client-Server Integration.

Infrastructure and Tools: Docker, Docker Compose, Git.

Testing: JUnit, Mockito.

Methodologies: Scrum / Agile methodologies.

Projects (Technical Experience)

Civix — Urban Incident Management Platform (Microservices Architecture)

- Backend development base don microservices using Spring Boot.
- Implementation of REST APIs for inter-service communication and frontend consumption.
- Service orchestration using Docker Compose.
- Application of Clean Architecture and domain separation.
- System designed for scalability and extensibility.

CasaAgenda — Property and Rental Management System

- Full stack development using Spring Boot (backend) and Angular (frontend).
- Implementation of reactive forms for data management in the frontend.
- Development of responsive user interfaces using Bootstrap.
- Full frontend-backend integration through REST APIs.
- Handling of image upload and UI visualization.
- Application of client-server architecture and best practices for layer separation.

Education

University Technical Degree in Programming – National Technological University | 2023-2025

Languages

English: Basic level, currently attending a year-long program at the Faculty of Languages (UNC).
